STATE LAND BOARD

BARBARA ROBERTS  
Governor

PHIL KEISLING  
Secretary of State

ANTHONY MEEKER  
State Treasurer

Re: Public access to Grande Ronde River/No. 00292

Dear Mr. Garlitz:

The subject project, in which you are proposing to provide public access, will involve State-owned submerged and submersible land on the Grand Ronde River.

The beds of tidal and navigable waterways are held in trust for the public and managed by the Division of State Lands, acting as the administrative arm for the State Land Board. This proprietary jurisdiction based on ownership is a function of the Division that is completely separate from the removal-fill regulatory program under which you were applying for your removal-fill permit. This proprietary authority is set out in Chapter 274 of the Oregon Revised Statutes.

You were successful in obtaining a permit from the U. S. Army Corps of Engineers and a removal-fill permit from the Division of State Lands, but you will also be required to, additionally, obtain an easement for the use of State-owned lands prior to commencing work on the proposed project. You will find enclosed an application form and a copy of the administrative rules for granting easements and rights-of-way across State-owned submerged and submersible lands.

In the future, when referring to this particular project, please use reference number. For further information, you may call Perry Lumley Ownership Coordinator, or me at 378-3805.

Sincerely,

*Melinda Ann Manley*

Melinda Ann Manley  
Engineering Secretary
